

---

*I would like to express my utmost praise for **Mommy & Me Pet Care** services. The founder and owner of **Mommy & Me Pet Care** is Sandi Carley. Sandi is a doting mom, a passionate animal lover as well as an experienced trained veterinary technician who has managed to merge the joy of motherhood with her affection for all animals to provide professional pet care "above and beyond" expectation.*

*Our family has always shared a house full of "critters". This pleasure makes it difficult to leave home or relax to enjoy a vacation. Hiring Sandi's services for my animals while I am away has helped me to be able to travel with complete peace of mind knowing that every creature's well being will be attended.*

*Sandi has lovingly watched over our aging and sick dogs and expertly administered medications; she has catered to our three finicky cats with their complicated food preferences and sleeping arrangements. She monitors our koi pond, checking the pumps and filtration system and feeding our fish so that all remains well within our water gardens when we are absent. She evens considers my wildlife-watching hobby and ensures that the the wild bird feeders are filled while we are away. The mail is brought in and without request, our plants tended and watered.*

*Attentive and loving care of our pets and thoughtful conscientious attention to our home from **Mommy & Me Pet Care** has made it possible for us to leave town and know that our precious pets and our home are looked after with the BEST quality of care.*

*I have come home weary after travel to my happy, contented and unstressed pets; clean kitty litter boxes, and a detailed chart of my pets' daily activities. I feel totally indulged and am very pleased with Sandi and her reliable and personal pet sitting services. **Mommy & Me Pet Care** truly goes "above and beyond" as a business that provides loving care and special attention for all animals. I highly recommend **Mommy & Me Pet Care** service.*

Sincerely,

Dana Campbell
